

A man in a green t-shirt is peeling a tomato with a red-handled peeler. The peeler is shown in the process of removing the skin, with a strip of peel being lifted. The man is holding the tomato with his left hand. On a wooden cutting board in front of him are several other tomatoes and some garlic. The background is dark and out of focus.

FISKARS®

The cooking catalogue 2022

Over 370 years of history are proof of our commitment to quality. Fiskars products are ingeniously functional, uniquely user-friendly, impressively long-lasting and aesthetically iconic.

Please note! All the measurements portrayed in the catalogue are products in packaging measurements.

The very first story began over 370 years ago.

1649

Fiskars ironworks founded in Fiskars village

1832

Production focuses on processing iron, and Finland's first cutlery mill is founded, with a product range expanding from knives to include forks and scissors

1883

Fiskars becomes a limited company

1929

Fiskars transforms to accommodate mass production

1956

Fiskars hones its expertise in cookware

All Fiskars cookware is manufactured at our own factory in Central Finland, in the village of Sorsakoski. The factory has been inseparable part of Sorsakoski and whole Leppävirta area since 1891, serving first as Hackman and later as Fiskars factory. Made from high-quality materials, our cookware is durable and timeless – perfectly combining innovation and Nordic craftsmanship.

Technologies & materials explained

Fiskars cookware materials

Stainless steel
Stainless steel is an outstanding cookware material that's suited to all kind of cooking. Due to its natural properties, stainless steel is extremely durable, hygienic and easy to care for. Stainless steel has a naturally attractive appearance and, by default, sustains very high temperatures. All Fiskars stainless steel cookware includes an Aluminium layer for improved heat conductivity, and it enhances product performance. All Fiskars cookware products work on any hob, including induction hobs. Fiskars stainless steel cookware product lines are **All Steel**, **Norden Steel** and **Hard Face Steel**.

Aluminium
Aluminium has very good thermal conductivity, thus it guarantees naturally equal heat distribution to base and sides of the cookware, speeding up food preparation and saving energy. Aluminium is light to handle and excellent for everyday cooking. All Fiskars cookware products work on all hobs, including induction hobs, thanks to a special treatment of Aluminium. Fiskars Aluminium cookware product lines are **Functional Form**, **Hard Face** and **Rotisser**.

Cast iron
Cast iron performs best for long and gentle simmering of soups and stews, oven-baking, and also for extreme, high-temperature frying of steaks and such due to its superior heat capacity. Cast iron cookware performs better with age due to natural seasoning it accumulates during use. Cast iron is not suited for the dishwasher, and it should be exclusively hand-washed. Fiskars cast iron cookware product line is **Norden cast iron**.

Technologies in our products

| Technology | Energy Base | OPTIHEAT™ | 3-layer base | Multiply technology | LZR-EDGE™ |
|---------------|--|---|--|--|---|
| Icon |  |  |  | |  |
| Description | <p>Energy Base performs well on all hobs, but the ultimate benefits are evident with a ceramic hob, where Energy Base heats up to 50% faster and uses 30% less energy by transferring heat easily.</p> <p>Used in all Fiskars Aluminium cookware products.</p> | <p>OPTIHEAT™ technology protects the cookware coating from overheating on an induction hob. When the temperature of the pan exceeds 230°C, the material demagnetises until the temperature drops. OPTIHEAT™ technology activates only on an induction hob but is usable on all other hobs too, just without the demagnetising properties.</p> | <p>High-quality impact bonded 3-layer base is optimised for efficient and even heating in cookware products. The layers are formed with a thick Aluminium core between high-quality stainless steel layers.</p> <p>Used in all Fiskars stainless steel cookware products (excluding Norden Steel that is manufactured with multiply technology.)</p> | <p>Cookware made with multiply technology has a stainless steel exterior and interior with an aluminium core between the steel layers. The aluminium layer is fully covered, making the product very long-lasting by preventing damage, while also providing a premium look.</p> <p>Works well on induction hobs. Heat also transfers well to the sides, making the item optimal for simmering.</p> <p>Multiply technology can include more than 3 layers.</p> | <p>LZR-EDGE™ technology is used in select Fiskars knives to give the knife long-lasting sharpness with the most perfect cutting angle. Sharpness lasts 4 times longer than a regular knife.</p> |
| Product lines | Rotisser, Hard Face, Functional Form | Rotisser OPTIHEAT™, Hard Face OPTIHEAT™ | All Steel, Hard Face Steel, Functional Form casseroles | Norden Steel | Hard Edge, Titanium |
| Ideal for | Ceramic hob, but suitable for all | Induction hob, but suitable for all | Performs well on all hobs | Performs well on all hobs | Long-lasting sharpness |

Coatings explained

Cookware, especially frying pans, are usually coated to improve non-stick properties. The non-stick properties prevent food from sticking on the surface of the cookware and make it easy to clean. Aluminium products are always coated, steel is only coated when non-stick is desired.

There are differences in the qualities and properties of the coatings. Fiskars PTFE coatings are 2-4 layers, while the 4-layer coating is the most durable and scratch resistant. The thickness and number of layers corresponds to the durability and performance of the cookware. Long-term properties are ultimately relative to the quality and processing of the coating. All Fiskars coatings are PFOA & PFOS free.

Even though coatings withstand high temperatures, the plastic blendings (PTFEs) turn softer and more sensitive on a very hot pan over 240°C. Our ceramic-based, non-plastics coating Ceratec™ and surface

treatment Thermium™ are more heat-resistant and fare well on hot temperatures and with hard use.

All PTFE-coated pans will eventually cycle out due to coating wearing or scratching off, and the cookware should then be disposed of. Our Thermium™- and Ceratec™-treated stainless steel products can, however, be used like any other uncoated stainless steel cookware, even though non-stick properties will decreased over time. The consumer is left with a product that has all the desireable properties of stainless steel. The same applies to Thermium™-coated enameled cast iron cookware.

Wooden, silicone, plastic and other non-scratching material utensils are highly recommended to maintain the coating surface in good condition and to lenghten the coated cookware lifespan.

Coatings used in our products

FISKARS COOKWARE LIFECYCLE

- 1 New Fiskars cookware is purchased from a store or fiskars.com.

2 Old cookware is returned to recycling center or station when coating has worn off.

3 Old cookware at recycling points and factory's surplus materials are collected and processed into recycled materials that end up back in the cycle for re-use.

4 The recycled material is processed into new material components.

5 High-quality Fiskars cookware is manufactured at historical Sorsakoski factory, in the middle of Finland, with modern and sustainable techniques.

On average, we use high-quality **85% recycled stainless steel** and have also started to use **100% recycled aluminium** in our cookware products. We use steel that has the lowest carbon footprint in the stainless steel industry.

Fiskars All Steel cookware product family has reached **exceptionally high recycling rate of 90%**.

We are very proud of the high percentages and aim to follow this development with other product lines in the future.

>**70% recycled materials**

Fiskars is dedicated to making **every moment** of cooking more **enjoyable**.

We believe that cooking with tools that match your skill level and motivation, it is easier to **succeed** in the kitchen and to truly **enjoy cooking**. For the passionate and quality conscious home chefs who see cooking as a way to **express** their **creativity** and for the busy working parents looking for easy solutions for everyday cooking, we have an offering that matches their needs.

Quality and **functionality** are core values driving the design of our products. All Fiskars cooking products are durable, ergonomic, user friendly and aesthetically designed.

**We believe that
happiness is
yours to create.**

Fiskars Premium

"Cooking for me is a way to express my creativity and get inspired. I love to find new culinary experiences. High-quality tools enable me to enjoy the cooking process and to achieve the best cooking results."

Norden

Lasting Nordic design,
inspired by nature

Norden draws inspiration from Nordic nature, culture and traditions and then reinterprets them in a modern way.

The range captures the Nordic way of living; progressive, yet strongly rooted in heritage. The range consists of cast iron and stainless steel cookware and premium kitchen knives.

Norden cast iron features & benefits

1 Perfect slow-cooking

Cast iron stores heat evenly and stays warm longer making the casseroles ideal for traditional slow cooking and simmering.

2 Unique mineral treatment

The unique **THERMIUM™** mineral treatment gives superior natural non-stick properties even in very high temperatures. The treatment is applied to Norden cast iron casseroles and frying pans.

3 Non-stick surface

The non-stick surface allows for frying even the most delicate ingredients.

4 Easy to maintain

No surface seasoning needed - easy to maintain.

5 Wooden trivet

Wooden trivet made of Finnish birch.

6 Wooden handle

The wooden handle is made of Finnish birch. It can be removed when placing the frying pan in an oven.

7 Norden cookware is made in Sorsakoski factory in central Finland.

Premium steel

The premium quality blade is made of high-performing, high-carbon, German standard stainless steel, which ensures superior performance and long lasting sharpness.
- 2

Optimal sharpness

The excellent performance is further enforced by sharpening angle of 26 degrees.

- 3

Stainless steel bolster

Stainless steel bolster gives the knife perfect balance in use.
- 4

Wooden handle true to knife making traditions

Handle is crafted from heat-treated birchwood, making the knife both very comfortable and naturally beautiful.

- Premium magnetic knife block made from heat treated birchwood.
- Can be used on the table or mounted on the wall.
- Please note, the knife block does not work with Titanium knives.

All Steel pure

Cook pure with our new uncoated and zero plastic stainless steel cookware

Pure is a new uniquely sustainable* and very durable choice for the quality-conscious consumer.

With superbly functional and long-lasting designs and visually pleasing aesthetics, Pure offers you the next generation uncoated, exceptionally durable cookware that combines sustainability and carefree performance.

Fiskars pure uncoated pans can be used at high temperatures and put in the oven. They are ideal for browning. However, to avoid burning and food sticking it is important to adjust the temperature gradually. Uncoated stainless steel pans can brown at lower temperatures vs. coated pans. They are extremely durable and almost eternal everlasting due to the uncoated surface.

*Made of 90% recycled materials, easy to recycle & no plastics.

All Steel pure features & benefits

Features & benefits

- 1 Durability**
Made of durable 18/10 stainless steel. Can also be used with metal utensils.
- 2 Safe handle**
Stainless steel handle is safe and ovenproof.
- 3 Unique engraved pattern**
The engraved pattern is meant for even spreading of cooking oils.
- 4 3-layer base**
The thick 3-layer base is optimised for efficient and even heating.
- 5 Rolled edge**
Re-inforced rolled edge, for better durability.
- 6 Sustainable grinding**
Matt inner surface made by water stone grinding technique.
- 7 Made in Finland.**
All Steel pans are made in Sorsakoski factory in central Finland.

Did you know?

Uncoated stainless steel pure pans brown in lower temperatures vs. coated pans. That's why it's very important to adjust and lower frying temperatures to avoid food burning and sticking. Try yourself and find the optimal temperature for your pure cooking moment!

All Steel

Durable performance
even at high temperatures

All Steel is the range for special occasions. All Steel pans guarantee perfect frying result, making food taste better. The secret behind this lies in the non-stick ceramic Ceratec[®] coating that browns beautifully. All Steel coating tolerates even higher frying temperatures.

Recommended for special occasions requiring the best browning.

All Steel features & benefits

MADE IN FINLAND

- Latest technology meets lasting design.
- Coated aluminium frying pan with highest quality materials and unique OPTIHEAT™ technology prevents pan from overheating on induction hobs.
- The OPTIHEAT™ technology ensures maximum 230°C heat which is the perfect searing temperature.
- 3-layer PTFE Hardtec Superior™ coating gives superior durability and non-stick properties and is PFOA/PFOS free.

Hard Face

Toughest non-stick cookware for everyday cooking

Hard Face is for tough use. The next generation Hardtec Superior+™ 4-layer PTFE coating has outstanding non-stick properties together with high abrasion and scratch resistance. The fourth layer in the coating also brings additional texture to the surface. This all results in improved lifetime performance. The silent silicon lids have built-in pouring functionality. The wide Hard Face assortment is recommended for the toughest everyday cooking duties.

Hard Face features & benefits

1 Superior coating

The next generation of our PFOA and PFOS-free Hardtec Superior+™ coating is even more durable and scratch resistant, for tough use.

2 Superior base

The energy base is optimised for 50% faster heating and saves 30% energy on ceramic hobs. The thickness of the base allows heat distribute efficiently and evenly.

3 Safe handle

Comfortable handle stays cool and ensures a good grip.

4 Flat glass lid with 2 pouring options

Lid made of silent and durable heat resistant silicone to support easy handling.

5 Works on all hobs

The **OPTIHEAT™** technology is optimised for induction, but works on all hobs. The **OPTIHEAT™** base technology prevents the pan from overheating on induction hobs.

6 Made in Finland

All Hard Face products are made in Sorsakoski factory in central Finland.

7 Appealing design

- Elegant flat glass lid.
- Matt black finish.
- Modern handle design.

Hard Edge

Sharp and tough durability for everyday use

Fiskars Hard Edge knives are designed to ensure that they stay sharp and can comfortably handle everyday cooking needs.

The knife blades are made of thick stainless steel with the revolutionary LZR-EDGE™ technology on the cutting edge. This allows the knife to stay sharp 4 times longer than standard knives. The knife handles also feature an ergonomic design with a unique 3D pattern to ensure the perfect grip.

Hard Edge features & benefits

Hard Edge knives are designed to ensure longer lasting sharpness for all occasions.

- 1

Revolutionary LZR-EDGE™ Technology

The hero part of the Hard Edge knife is the blade and edge. The edge has been refined using LZR-EDGE™ technology giving the knife long lasting sharpness, lasting 4 times longer.
- 2

Thick stainless steel blade

The knives have thick cut stainless steel blades for durability.

- 3

Comfortable grip

A Softouch™ and three dimensionally patterned handle for a comfortable and safe grip.
- 4

Easy to maintain

The knife is easy to maintain, when needed, it is easy to re-sharpen: any sharpening tool can be used. The knife is also dishwasher safe.

| | | | | | |
|-----------------|----------------|---------------|-----------------|---------------|------------------|
| Whetstone | | | | | Art. no. 1058937 |
| Height: 28.4 cm | Length: 4.5 cm | Width: 7.9 cm | Weight: 0.76 kg | Retail box: 4 | Old art. no. - |

- All-In premium knife sharpener set that is suitable for every knife in your kitchen.
- The set includes
 - a whetstone with two grits 1000/5000
 - a sharpening angle guide (26°)
 - a polishing leather and
 - a storage case

To sharpen your knife, follow these steps:

1 Soak

Start by soaking the whetstone in water for 5-10 minutes. Water will act as lubrication when you sharpen the knife.

2 Grey coarse grit

After soaking the whetstone place it in the non-slip holder with the grey/coarse grit (1000) facing upwards.

3 Knife in angle guide

When using the sharpening angle guide, the easiest way to start is by placing the angle guide close to the handle and tighten the orange knob.

4 Start sharpening

Hold the knife and angle guide so that the blade meets the stone. The angle guide is supposed to softly touch the stone together with the blade. Push back and forth across the stone with smooth and steady strokes.

5 Sharpen remaining parts

Move the angle guide closer to the tip of the knife to sharpen the remaining parts of the blade.

6 Turn the knife

After one side is done, turn the knife and repeat with the other side of the blade.

7 White smooth grit

Now it's time to turn the whetstone to finalise the sharpening, with the white/smooth grit (5000) facing upwards. Sharpen the whole length of the blade using the angle guide and repeat for both sides of the blade.

8 Rinse

You're almost done here. Now remove the angle guide from the blade and rinse both the knife and the whetstone under running water and dry both with a cloth. Be careful, your knife is now super sharp!

9 Polishing leather

Add a final touch by polishing the blade with the provided polishing leather. Place the leather on top of the stone with the rough side up and stroke the knife carefully along the leather 3-5 times on both sides (see image).

10 Maintenance

Congrats, now you're done! For more information on maintaining your knives, please visit www.fiskars.com

Norr

Wooden handle for classic cutting

Fiskars Norr knives provide the authentic cutting experience for those who have a passion for genuine cooking. This timeless Nordic design piece is made of carefully selected premium materials for the perfect handling experience.

Norr knives

features & benefits

Beautiful Nordic design and high quality environmentally sustainable materials.

1 High quality blade

High quality blade is made of German steel hardened for optimum hardness HRC 54.

2 Comfortable design

- Inspired by traditional Nordic cuisine and culture.
- Very comfortable to hold
- Perfectly balanced and durable thanks to full tang.
- Designed by Jacob Leth-Espensen.

3 Durable handle

- The handle is made from Kebony treated maple wood.
- Sustainable FSC®-certified maple.
- Kebony treatment for increased durability - 40% harder than teak.

Classic scissors

Since 1967

The iconic design classic, with superior quality and performance,
for all cutting needs. Made with premium materials.

The icon

The iconic Classic scissors are a symbol of Fiskars and our Finnish design heritage

Features & benefits

- 1 Sharp blades**

Specially developed blade grind ensures blades stay sharp longer while providing high-precision cuts.
- 2 Easy cleaning**

Handles are injection-molded onto the blades, ensuring easy, hygienic cleaning.
- 3 Supreme ergonomics**

Handles are designed under strong consideration of the natural movement of the hand, resulting in enhanced comfort and cutting control.
- 4 Best materials**

Made of the best quality materials, Classic scissors offer outstanding comfort, performance and durability.
- 5 Quality control**

Each product is manually tested before leaving the factory ensuring you get only the best scissors.

The Curious Mind of

Oiva Toikka

ReNew scissors

These Fiskars scissors are skillfully crafted from recycled and renewable materials at our factory in Billnäs, Finland. The scissors handles are made from an innovative biocomposite material consisting of 66% recycled post-consumer plastic and 34% renewable cellulose fiber, a sustainable alternative to fossil-based materials. The blades themselves are also made of recycled stainless steel.

In addition to being made of recycled and renewable materials, these scissors are designed to last - just like all of our other products.

ReNew

– a sustainable choice for all cutting needs in creating, cooking and gardening

Features & benefits

1 Made of recycled and renewable materials

Total scissors are made of 80% recycled materials and 13% renewable materials. Scissors are 100% recyclable. Scissors packaging is made of 100% recycled and recyclable paper fiber.

2 Sharp blades

Durable stainless steel blades are made of 85-95% of recycled stainless steel.

3 Ergonomic design

Comfortable handles are made of 66% recycled plastic (post consumer package waste) and 34% natural cellulose fiber.

4 Made in Finland

These scissors are made using an eco-friendly process in our environment-, quality- and safety-certified scissors factory in Billnäs, Finland.

5 Tested by hand

Scissors are tested by hand at the factory. Only our very best scissors are ever cleared to leave the factory.
